

STUDENTS FOR APP TESTING

Pyxima is looking for students to test our mobile application Pyxicare on a weekly basis on Android, iOS and Windows. Are you the student who wants to gain experience in a young innovative IT-company? You get the chance to work as mobile software tester for our leading product! Are you available to start in September? Contact us!

TASKS

- You translate functionality in test cases and test scenarios.
- You perform manual test scenarios on different tablets.
- Both content checks and technical tests are part of the job.
- You like to discover and reproduce bugs.
- You can communicate clearly; you report directly to the development team and the customer team.
- You can work independently.

SKILLS

- You are a student Bachelor or Master Computer Sciences
- You have working experience with Android and/or iOS tablets.
- You work independent and are capable to work in a structured manner.
- You have an eye for details!
- You have good knowledge of Dutch and English. Documents are written in English.
- You are available at least a few hours a week during office hours for several months.

OFFER

- Fun colleagues in a dynamic team.
- You work at our office in Geel.
- Flexible working hours: work time -and periods are adapted how it suits everyone. Important is you can be at the office on a regular basis.
- Possibility to more technical work if you have the correct skills and attitude.
